COMP 2139 — Introduction to ASP.NET Core MVC

Assignment 1: Demonstration Checklist & Status Report

GBC_Travel-Group-<Number> · Due Friday, October 16, 2026, 11:59 pm · Video: 10 minutes maximum

Group Number		**Section:**
	Full Name	**Student ID**
Member 1 (Team Lead)		
Member 2		
Member 3		

Part A — Status Report (Submit This)

Complete this report, show it during your video, and submit it on Brightspace. Tick one status per requirement: **C** = Complete, **P** = Partial, **N** = Not implemented, and briefly explain anything marked P or N.

Requirement	Status	Notes (what's missing and why)
Flight and Hotel Listings		
Seed data: at least 5 flights and 5 hotels	☐C ☐P ☐N	
List page for flights and for hotels	☐C ☐P ☐N	
Details page for each flight and hotel	☐C ☐P ☐N	
Search, Filtering and Sorting		
Flight search form (2–3 parameters)	☐C ☐P ☐N	
Hotel search form (2–3 parameters)	☐C ☐P ☐N	
Results show key details and link to the details page	☐C ☐P ☐N	
At least one filter (e.g., price range)	☐C ☐P ☐N	
At least one sort option (e.g., price low to high)	☐C ☐P ☐N	
Clear message when no results match	☐C ☐P ☐N	
Application UX and Design		
Home page with direct access to flight and hotel search	☐C ☐P ☐N	
Navbar with no dead links; footer with group number and member names	☐C ☐P ☐N	
HTML / CSS / JavaScript used to improve the user experience	☐C ☐P ☐N	
Database		
Flights and Hotels tables with data annotations (required fields, lengths, ranges)	☐C ☐P ☐N	
Class diagram or ERD included and presented	☐C ☐P ☐N	
EF Core migrations used and committed to the repository	☐C ☐P ☐N	

Part B — Recording Checklist (Do Not Submit)

Work through this as a group before and after recording. Figure numbers refer to the wireframes in Appendix A of the assignment. There is no minimum video length: a clear, focused demonstration is better than a long one. The only limit is **10 minutes maximum**.

1. Before You Record

✓	Item
☐	The application runs from a fresh clone of your repository, and the database is created from your EF Core migrations with seed data loaded.
☐	Your Status Report (Part A) is complete and open on screen.
☐	IDE font and browser zoom are large enough to read when recorded; notifications and unrelated windows are closed.
☐	Every presenter has tested their microphone with a short test recording.
☐	You've decided who presents what — every member demonstrates part of the application **and** explains some code.

2. What to Show, in Order

✓	Item	Presenter / Notes
☐	**Intro slide** (one slide only): a current photo of each member (no avatars), full names, student IDs, COMP 2139 — Introduction to ASP.NET Core MVC, your section, and Assignment 1 / group number.	
☐	**Status Report**: walk through it briefly — what's complete, and what isn't and why.	
☐	**Home and navigation** (Figure 1): home page, navbar links and footer.	
☐	**Search** (Figure 2): search flights and hotels, apply a filter and a sort, and show the no-results message.	
☐	**Details** (Figure 3): open a flight and a hotel details page from the search results.	

3. Code Walkthrough

Each member explains at least one segment. Be selective: explain the decisions, not every line.

✓	Item	Presenter / Notes
☐	**Models and database**: your class diagram, an entity model with its data annotations, your DbContext with seed data, and the Migrations folder.	
☐	**Search**: the controller action that receives the search parameters (model binding) and filters and sorts the results with LINQ.	
☐	**Details**: the action that takes an id from the route, and how it handles an id that doesn't exist (e.g., `NotFound()`).	
☐	**Views**: the search form using tag helpers, a strongly typed Razor view (`@model`), and your shared layout with the navbar and footer.	

4. Before You Submit

✓	Item
☐	Watch the whole video back: every voice is clear, code is readable, and it runs **10 minutes or less**.
☐	The video link can be viewed by your instructor — test it in a private/incognito browser window.
☐	The team lead submits on Brightspace: the completed **Status Report**, the **video link**, and the **private GitHub repository URL** (with instructor access). No zip files or emailed submissions.

Grade-Zero Triggers and Late Policy

- **No video** submitted, or a video **longer than 10 minutes**.
- Video or audio quality too poor to evaluate.
- Code **shared** with, or copied from, another group.
- Late submissions lose 20% per day and are not accepted after 5 days.
